

AIRLINE FLIGHT NOTIFICATIONS

Below are links of major US airlines to allow you to easily subscribe for flight notification systems with each airline.

Many airlines will provide **two options** for flight notification alerts:

- 1) Enroll in their frequent flyer program and be notified of all your flight delays/cancellations/reminders and more each time you travel with the airline.
- 2) Create a notification for an individual flight with the airline. This is helpful when you are assisting someone who is traveling or if you do not want to enroll in a frequent flyer program.
